Improvements link into cycle track along Whitelegg Way to Northbourne Roundabout.

Carriageway resurfacing on Wimborne Road between Northbourne Roundabout and Ferncroft Road.

New parallel crossing, with dedicated space for people to walk and cycle across Redhill Drive.

Route connects into on road advisory cycle lane.

New toucan crossing installed over Redhill Avenue.

Exit arm of the roundabout to be realigned to accommodate the shared path and promote lower speeds.

New toucan crossing was completed as part of the Whitelegg Way works.

New shared path for walking and cycling installed connecting into Wimborne Road service road.

New toucan crossing installed over Wimborne Road (A3060).

Junction improvements. Installation of tactile paving to improve crossing point.

Minimum 3m-wide shared path for walking and cycling installed, providing a link for people to walk and cycle around Redhill Roundabout.

New shared path area for walking and cycling connecting into quiet route along service road.

Three parking spaces removed to allow for the new shared path, with other parking spaces outside the shops unaffected.

Existing crossing over Muscliffe Lane to be upgraded to a toucan crossing, allowing people to walk and cycle across the road in one stage.

Junction refurbishment including new energy efficient traffic signal technology.

**Funded by
UK Government**

This map is a diagrammatic interpretation of proposals as of December 2024. Not to scale. Existing facilities, including footways and crossings, to be retained unless otherwise indicated. Adjoining roads only indicated as points of reference. Road markings not included.
